

## ACKNOWLEDGEMENT

The Environmental Codes of Practice (ECoP) has been prepared by SENES Consultants India Private Ltd. as a component of the Implementation of the Environment Management Programme (EMP). The preparation of ECoPs would not have been possible without the guidance and contribution received from Dr. A.C. Dhariwal, Director, National Vector Borne Disease Control Programme (NVBDCP), Dr. G.S. Sonal, Dr. R.S. Sharma, Dr. R.K.Dasgupta, Dr. P.K.Srivastava, Dr. K.S.Gill and Mr. Rajendar Thapar on behalf of the Directorate, NVBDCP. The development and implementation of the ECoPs are part of a national level programme, supported by the World Bank.

In addition, we acknowledge the valuable inputs provided by Mr. Kevin Munn (Project Officer, United Nations Environmental Programme Chemicals Branch, DTIE, Geneva, Switzerland), Mr. Paul Banda (Chief Health Officer, Konkola Copper Mines Plc. Chingola) and Mr. Egon Wienmuller (Head of Business Management, Global Public Health, BASF, Germany).

This document has been peer reviewed internally by Dr. A.K.Ghosh and Dr. A.K.Hati and externally by Dr. A.K.Mohanty, Dr. N.Kalra, Dr. J.C.Paliwal, and Mr. P.T.Joshi. Valuable comments received from both of these reviews were incorporated considering the applicability of the best management practices regarding the use of insecticides in the Indian perspective.

It is the constant endeavour of the Directorate of NVBDCP to continuously update this guideline to minimize adverse environmental impacts associated with the use of insecticide under the NVBDCP. It is sincerely hoped that the states and the union territories will follow the guideline to ensure an environmentally sound programme.
