

Priority Areas of National Malaria Control Programme on which support of Non Governmental partners is sought

Dte. Of NVBDCP, MoHFW, Gol; wishes to solicit support of non governmental agencies for effective implementation of malaria prevention & control activities as working partners from Non Governmental Organizations and Non Profit Private Sector Organizations under the Global Fund supported Project. The geographical areas where the support is sought are the states of North Eastern region and other Malaria Endemic States of the country. The priority areas on which support is sought are as under:

1. Capacity Building:

- To assess the training need of the programme personnel and the components which need to be revisited/refreshed for enhancing the skills and knowledge of the programme functionaries.
- To train health workers for better implementation of programme activities towards achievement of established targets and goals.

2. IEC/BCC:

- Development of tools for effective IEC/BCC for malaria control & prevention for strengthening of IEC/BCC activities through the involvement of community.
- Organizing campaigns to improve knowledge & awareness for effective preventive and curative malaria control activities.

3. EDCT (Early Diagnosis and Complete Treatment):

- To provide early diagnosis and prompt/complete treatment of Malaria to the community.
- Early referral of serious and complicated Malaria cases.

4. SCM (Supply Chain Monitoring):

- To assist in distribution and management of logistics i:e Drugs and Diagnostics
- To monitor the stock availability at each level of Health Care Delivery so as to sustain the EDCT component of the programme and also to minimize the expiry/wastage.

5. Community Mobilization:

- To enlist support of FBOs, Local NGOs and other local bodies in increasing awareness about prevention & treatment of Malaria.
- To sensitize and involve the community in malaria control & prevention activities.

6. Vector Control:

- To help and supervise Indoor Residual Spray activities.
- To help in source reduction through involvement of Local Village bodies/PRI and sensitization of village health & sanitation committee to carry out minor engineering works.
- To assist in impregnation of Community owned bed nets.
- To help in distribution and monitoring the usage of LLIN/ITN by the community.

7. Monitoring & Supervision

- To work as complementary partner in monitoring and supervision of programme implementation activities.
- To assist in achieving universal coverage of Health care delivery system and preventive measures so as to reduce malaria mortality & morbidity.
- To identify areas / activities which need more stress so as to have effective programme functioning.
