Flow Chart of Logistics/Supply Chain of NVBDCP drugs/commodities

Guidelines for Proper Storage of Drugs and Commodities under NVBDCP

The main purpose of storage is to protect the quality of products and its packaging throughout the supply chain and make products available for distribution. The brief guidelines for storage of drugs/commodities are mentioned below:

1. Clean and disinfect the store room regularly and monitor the storage conditions
2. Clean receiving, storage, packing areas and remove the garbage and also keep the stores away from rodents, insects and termites
3. Safely handle the health commodities while loading and unloading from the transport vehicle
4. Clean bins, shelves and cupboards, if needed and Store supplies in a dry, well-lit and well ventilated store room and out of the direct sunlight
5. Ensure adequate ventilation and temperature control
6. Provide the rack storage system in such a way so that gang ways may be created for easy movement of materials and personnel handling the store
7. Stack cartons in steel racks/slotted angles and at least 10 cm(4 inch) off the floor, 30 cm (1ft) away from the walls and other stacks and no more than 2.5 m (8ft) high
8. Store supplies in a manner that is accessible for FEFO, counting, and general management. Use First Expiry First out (FEFO) principle. Please issue the drugs which are going to expire first.
9. Store medical supplies separately, away from insecticides, chemicals, old files, office supplies, and other materials.
10. Arrange cartons so that arrows point up, and ensure that identification labels, expiry dates, and manufacturing dates are visible.
11. Monitor store security and safety to avoid theft/pilferage
12. Secure store room from water penetration and from any seepage in the walls, roof, doors & windows, especially during rainy season
13. Monitor product quality (visually inspect commodities and check expiry dates) and physical verification of quantities
14. Ensure that fire safety equipment (fire extinguisher) is available and accessible and that personnel are trained to use it.
15. Ensure fire proof electrical fittings and appliances for any fire due to short circuit and keep the stocks away from the electrical sockets
16. Separate damaged and expired stocks from the usable stock and move to secure area and dispose of these products without delay as per the established procedure
17. Monitor stock levels, stock quantities and safety stocks and update stock ledger/records and maintain the files safe custody.
